

## **1B. INDIVIDUAL STUDY SPACE**

**Berio is a public library with completely open access for those users who want to browse the open shelves and read in the informal seating areas located on different floors and outdoor areas. The staff is available to welcome the users' needs and to address any specific requirements they may have.**

**As a service for members of the Genoa Public Library System, the use of individual study stations, equipped with a light and an electrical outlet, is regulated by a reservation system. The library hosts over 200 of these stations, which are mostly located in the D wing. Therefore, users can easily reserve a station using the online platform available on the library catalogue or the dedicated app.**
